Will's flea market finds

Sep 26th, 2010, 1:09pm

Went on our local flea market today. Last one of the year. Saw some nice stuff. Like a button logo high dome #10 lid. Only problem was the \$300 price tag. Saw other stuff out there, like Griswold waffle irons for \$95 Lots of high prices. But Jenny and I bought 3 items. Like we need more. Here is a picture of the 3 things. One is a 733 stove. Pretty dirty with one cracked grate. But other wise pretty nice. Jenny had to have the tobacco cutter. It is a Griswold too. And last if a #3 heart patty mold. I know I have one #3, but is it another heart or the round one??? Time to find the other. Hope you enjoy.

Will 😊

I like Jennys tobacco cutter. NICE 😊

That stove looks like a looot of work, but I know you are good at that Will, so its right up your alley. 😊

Stove coming apart right now. Also brought this one over from my parents house to fix up too. It is a 501 with an optional burner with a flame tamer.

Will 😊

Thats a pretty neat picture with the flame tamer Will. I never would have guessed they worked that way. Do you

know if ALL flame tamers work that way? I would have ASSUMED that the flame tamer just sits on top of the burner and then you set your pan on the flame tamer. 🤔

The top portion of the burner removes and the flame tamer sits on it. It is in one of the catalogs.

That tobacco cutter is amazing Will!! Good luck with the 3 burner stove. I have had mine just about finished for a couple of year now 😊

The stove is all painted except for the grates. Putting together now and got to finish the grates. When done, I will post.

Darn, that looks great Will....if I sent you two stoves can you make them look that nice? I would even pay shipping both ways?

Rick, I got \$10 in bolts alone into it. Can only find stainless steel slotted screws in that size. Got new square nuts too.

Paint is Ford high temp black. The aluminum is high temp too. I am never going to fire it up, but just in case. 😊 4 days of working on it. Probably about 8 hours total. Still trying to get the one burner apart. Bolts are really rusted on that one.
