 **Ut-oh, another WI**

Jan 23rd, 2012, 5:35pm

Found this today in a local thrift store. The handle of the base has a repair, but over all it's still pretty cool. Guess I have a new foundry to research 😊

Pretty neat, Jodi.

Is there a corresponding strap of metal on the bottom side of the handle?

Hey Terry--In fact there is an identical plate underneath with nuts on the screws. Pulled them off to see how much damage and found the handle was broken off right in the middle of the "hang" hole, but the broken piece is there. I was hoping it was just cracked. Still cool though.

Love it. Dave likes photos of old repairs.

You could have it welded. If done properly only a braising line will show. That can be covered with a touch of BBQ paint. One of my favorite Erie skillets has been fixed & I'll wager you couldn't find the seam. Sue
